Professional Summary

Java Backend Engineer with 3.5+ years of experience building scalable backend applications using Java 8–17, Spring Boot, and microservices architecture.

Experienced in REST APIs, asynchronous messaging, SQL Server optimization, and cloud-based backend services using Kafka, Azure Service Bus, AWS, and Azure.

Worked on enterprise platforms for clients including National Life Insurance, Verizon, Comcast, and 3M across insurance, telecom, and compliance domains.

Technical Skills

- **Languages & Frameworks:** Java 8–17, Spring Boot, Spring MVC, Spring Security, JPA/Hibernate
- **Backend Development:** Microservices, REST APIs, GraphQL APIs, Event-Driven Architecture, SOLID Principles
- **Messaging & Caching:** Apache Kafka, Azure Service Bus, AWS SQS, Redis
- **Databases:** SQL Server, Stored Procedures, Query Optimization, Indexing, Execution Plans
- **Cloud & DevOps:** AWS, Azure, Docker, Jenkins, GitHub Actions, CI/CD
- **Security:** JWT, OAuth2, Auth0, RBAC
- **Testing & Monitoring:** JUnit, Mockito, SonarQube, Kibana, JVM Profiling

Professional Experience

Software Engineer

Sep 2024 – Present

Cognizant Technology Solutions — Client: National Life Insurance (USA)

- Developed 18 Spring Boot microservices using Java 17 for insurance workflow automation and backend processing.
- Implemented asynchronous processing using Azure Service Bus with retry handling and dead-letter queue (DLQ) mechanisms.
- Supported backend systems processing **2,00,000+ requests per hour** during peak traffic.
- Resolved production issues involving JVM memory leaks, CPU spikes, SQL Server deadlocks, and ASB SDK timeout failures.
- Improved API response time through SQL query tuning, indexing, and execution plan analysis.
- Migrated legacy VBScript and .NET APIs to Java 17 and Spring Boot microservices.
- Contributed to production monitoring, RCA activities, and deployment validation.

Junior Software Engineer

Jul 2022 – Aug 2024

Cognizant Technology Solutions — Clients: Comcast, Verizon, 3M

- Developed RESTful backend services using Java and Spring Boot for telecom and compliance platforms.
- Built GraphQL APIs for CRM systems, improving data retrieval performance by **15%**.
- Integrated Kafka and AWS SQS for asynchronous communication between services.
- Implemented authentication and authorization using JWT, OAuth2, and Auth0.
- Worked on Angular-based frontend modules for compliance management applications at 3M.
- Optimized SQL Server queries and stored procedures to resolve deadlocks and long-running executions.
- Containerized services using Docker and supported CI/CD deployments through Jenkins pipelines.
- Investigated and fixed backend production defects across distributed services.

Education

Bachelor of Engineering in Computer Science

Sethu Institute of Technology

2018 – 2022
